

Product data sheet

Emergency signal

Reference number

NRS AS 0834 RM

Emergency signal

screw fixing only, without claws
without frame

The emergency signal can e.g. be installed outside next to the WC door or landing door. A triggered emergency call is signalled visually by a red LED and acoustically by a buzzer. Both signals can, if required, be changed from continuous light/continuous tone to flashing light/pulsing tone.

The floating relay contact (24 V / 2 A) can be used to trigger external signalling devices.

for AS and A ranges

Thermoplastic (breakproof) high-gloss

Colour:

ivory

Material:

thermoplastic
